SUMMARY

Computer Science undergraduate (CGPA 8.16) passionate about Full-Stack Development, Real-Time Systems, Networking and Problem Solving. Experienced with MERN Stack, Python, Socket Programming and scalable web applications.

EDUCATION

Qualification	Institute	Details
B.Tech CSE	Chitkara University	2024–2028 CGPA: 8.16
Class XII	Govt. Sr. Sec. School, Dhamandri	HP Board
Class X	Rudra International School, Basal	CBSE

TECHNICAL SKILLS

Java • Python • JavaScript • HTML • CSS • React.js • Node.js • Express.js • MongoDB • Flask • Tailwind CSS • Socket.IO • JWT • Git/GitHub • Leaflet • Vercel • Render

PROJECTS

BloodOcean – Full-Stack Blood Donation Platform

React.js | Node.js | Express.js | MongoDB | Socket.IO | Leaflet | JWT | Tailwind CSS

- Developed a **20+ page** full-stack blood donation platform with geospatial donor search, emergency blood requests, and real-time donor matching using MongoDB Geospatial Queries.
- Built real-time features including **live donor tracking, notifications, route visualization, and ETA** using Socket.IO, Leaflet, OpenStreetMap, and OSRM.
- Implemented **JWT authentication, role-based access, a 7-tab admin dashboard, bilingual support (350+ translations), and deployed on Vercel & Render.**

FlashDrop – Browser-Based Peer-to-Peer File Sharing

Python | Flask | TCP Socket Programming | HTML | CSS | JavaScript

- Built a browser-based **peer-to-peer file sharing** application enabling direct **IP-to-IP** file transfers over a local Wi-Fi network without cloud storage.
- Implemented **chunk-based file streaming**, drag-and-drop uploads, multi-file transfer, transfer progress, speed monitoring, and ETA calculation for reliable file sharing.
- Developed the backend using **Python Flask and TCP Socket Programming**, enabling efficient real-time communication between devices on the same network.
- Optimized local transfer performance, achieving speeds capable of transferring approximately **30 GB of data in 3–4 minutes** under favorable network conditions.
- Gained hands-on experience with **Computer Networks, Peer-to-Peer Architecture, TCP/IP, Socket Programming, File Streaming, and Backend Development** by solving a real-world cross-platform file-sharing problem.

CERTIFICATIONS

- Machine Learning Specialization – Columbia University (Coursera)
- Microsoft Certified – Generative AI
